**PRESERVE THE LIVING SEAS**

Pragati Yacht has partnered with Ecoworks Marine to launch their wide range and sustainable Eco line of cleaning products to start a change in our oceans in the USA territory.

Ecoworks Marine, Preserve the Living Seas<sup>®</sup> range, is the most sustainable way to keep vessels clean and to help reduce the pollution impact on all our oceans.

14 products that has been specifically formulated to be the most environmentally friendly, marine safe, sustainable, non-flammable, bio-renewable and the quickest biodegradable to minimize the stress, acidity and potential pollution impact on the marine environment.

The Ecoworks Marine, Preserve the Living Seas<sup>®</sup> line has a wide range of coverage, from laundry detergent to engine cleaner.

Our aim is to play our part in providing Superyacht, boat and marine industry operators, with a complete range of products for all areas, the interior, exterior and the engineering departments.

All Ecoworks Marine Preserve the Living Seas<sup>®</sup> products are compliant and surpass the MARPOL Annex 5 1.7.5 criteria and are declared not harmful to the marine or river environment. The Preserve the Living Seas<sup>®</sup> brand is a statement of intent from Ecoworks Marine to help reduce the decline of the fauna and flora of our oceans.

# Ecworks Marine, Preserve the Living Seas® product line

ecoall Surface Cleaner  
ecolaundry Liquid  
ecowashing-up Liquid  
econatural Sanitizer  
ecowashroom + head cleaner  
ecoglass cleaner  
ecovarnished wood cleaner + wax  
ecofabric cleaner

ecorib cleaner  
superyacht washdown  
ecoengine cleaner  
ecobilge cleaner  
ecofogbuster® drain cleaner +  
grey water additive

# Core Ingredients

- Eco-solvents from plant
- Plant and fermentation extracts
- Naturally derived sustainable surfactants
- Naturally occurring non-hazardous bacteria and enzymes

Fundamentally our products are a very clever blend of specifically chosen bacterias and enzymes, engineered by our two Doctors of Biochemistry.

They are very different to chemical cleaners that use very high (alkaline) or very low (acid) pH levels to burn dirt and organic matter from a surface, in that they utilize the natural resources of nature, and using targeted blends of bacterias/enzymes and other ethical and replenishable resources, they eat the dirt off a surface. Therefore, they do not damage the surface, the environment, or harm the person using them.

# Qualities

- PH Neutral -Phosphate Free
- Qualities -No Harmful chemicals
- MARPOL Compliant
- Marine pollution convention 73/78
- Ultimate Biodegradability 80% in 28 days, remaining 20%

Within 90 days. -Most "Biodegradable" products are only primary which is 20% in 28 days with no limit as to when the remaining substance will disintegrate.

# Our packing

- We package our liquids within clear HDPE 2 Plastics.
- Made mainly from post-consumer products and are recyclable at the end of their useful life.

Is the most environmentally stable of all plastics – giving off no harmful fumes into the environment. Can be recycled up to 10x.

It is more cost efficient to produce HDPE 2 than virgin plastic.

Clear plastic is important also, many recycling centers don't have the means to process colored plastic bottles.

Why not Glass?

Glass creates more than 6 times the global warming gases than plastic during manufacturing glass is heavy for transportation and shipping.

Why not bioplastics?

Made from the same materials as conventional petroleum based plastics, but with even more chemicals to help break down faster.

Can not be recycled.

When on landfill they produce methane gases.

# Benefits

Our products are highly concentrated, many of which require diluting. This has the benefits of reducing your consumption of plastic, less product to store on board and making them very economically priced.

All Surface Cleaner 1 Liter  
1:10 (1L will do 10L saving 9  
HDPE 2 Plastic bottles!)

RRP \$ 20 diluted cost =\$ 2  
a liter

Engine Cleaner 5 Liter  
1:10 (5L will do 50L saving 49 HDPE  
2 Plastic bottles!)

RRP\$ 61 diluted cost =\$ 6.1 a  
liter

We aim to replace undesirable ingredients wherever possible with eco-solvents, plants and fermentation extracts, naturally derived sustainable surfactants, naturally occurring non-hazardous bacteria and enzymes.

We want our cleaning products not only to be safer for the environment but safer to the end user as well.

"The more time you spend out at sea, the more you understand the need to preserve it. Because when you live on the water, there's no buffer. It's crucial that everything you use on board is completely environmentally friendly. As we embark on our two year Round the World voyage, we're proud to have Ecoworks Marine as an official supplier who share our passion for protecting the oceans. Our hope is that the rest of the industry follows their lead."

Emily Penn - Founder of expedition

Ecoworks Marine Appointed Sustainability Partner to the 52 SUPER SERIES,

the world's leading grand prix mono hull yacht racing circuit and 2019 marks the

eight season of the 52 SUPER SERIES. With 12 teams made up from 20 nations
